Get full access to Red Hat Certified System Administrator (RHCSA) Complete Video Course and 60K+ other titles, with free 10-day trial of O'Reilly. Through the use of topic-focused instructional videos you will gain an in-depth understanding of the Red Hat Certified Administrator (RHCSA) exam as well as a deeper understanding of Red Hat Enterprise Linux so you master the key foundational principles of systems administration. The videos consist of live trainer discussions, CLI presentations, live demos, and practice exam exercise walk-throughs. Topics include: IT Certification, Programming, Web Development, Mobile Development, Home and Office Technologies, Business and Management, and more. Included with the product are dynamic and interactive hands-on exercises and quizzes so you can test your knowledge while you study. More information about Sander is on his website at www.sandervanvugt.com. Skill Level: Beginning to intermediate. What You Will Learn: Key concepts for all of the objectives on the Red Hat Certified Administrator (RHCSA) exam. Information on the new RHEL 7 exam. Who Should Take This Course: Primary audience: Red Hat Certified Administrator (RHCSA) certification candidates. Secondary audience: Anyone interested in learning about Red Hat from the ground up. Linux engineers that are interested in learning more about Red Hat Enterprise Linux. Junior system administrators that want to deepen their skills. Administrators currently administering UNIX systems and also developers that write software for Linux. Course Requirements: The ideal target student does have some preliminary Linux knowledge already, as this course doesn't focus on basic Linux usage, but on Linux administration. Table of Contents: Introduction: What to Expect on the RHCSA Exam. Preparing an Environment for Doing Exercises. Part 1—Performing Basic System Management Tasks. Lesson 1: Installing Red Hat Enterprise Linux Server 1.1 Introduction. 1.2 What You Need on Your Server. 1.3 Installing Red Hat Enterprise Linux Server. Exercise 1. Summary. Lesson 2: Using Essential Tools. 2.1 Introduction. 2.2 Using man. 2.3 Understanding vim. 2.4 Editing text files with vim. 2.5 Understanding Globbing and Wildcards. 2.6 Using Globbing and Wildcards. 2.7 Understanding I/O Redirection and Pipes. 2.8 Using I/O Redirection and Pipes. Exercise 2. Explanation to Exercise 2. Summary. Lesson 3: Essential File Management Tools. 3.1 Introduction. 3.2 Understanding Linux File System Layout. 3.3 Essential File Management Tasks. 3.4 Finding Files. 3.5 Understanding Links. 3.6 Working with Links. 3.7 Working with tar. Exercise 3. Explanation to Exercise 3. Summary. Lesson 4: Working with Text Files. 4.1 Introduction. 4.2 Understanding Regular Expressions. 4.3 Using Common Text Tools (tail, head, tr, cut, sort). 4.4 Working with grep. 4.5 sed and awk basics. Exercise 4. Explanation to Exercise 4. Summary. Essential commands fill in the blank exercise. Lesson 5: Connecting to a RHEL Server. 5.1 Introduction. 5.2 Opening Local Shells (Including Virtual Consoles). 5.3 Connecting to a Server with SSH. 5.4 Understanding SSH Keys. 5.5 Using SSH Keys. Exercise 5. Explanation to Exercise 5. Summary. Lesson 6: Managing Users and Groups. 6.1 Introduction. 6.2 Understanding the Need for Users. 6.3 Understanding User Properties. 6.4 Creating and Managing Users. 6.5 Understanding Group Membership. 6.6 Creating and Managing Groups. 6.7 User and Group Configuration Files. 6.8 Managing Password Properties. Exercise 6. Explanation to Exercise 6. Summary. Quiz exercise about users and groups. Lesson 7: Connecting to an LDAP Server. 7.1 Introduction. 7.2 Understanding LDAP. 7.3 Telling your Server Where to Find the LDAP Server. 7.4 Understanding Automount. 7.5 Understanding sssd. 7.6 Modifying sssd Configuration. Exercise 7. Explanation to Exercise 7. Summary. Lesson 8: Managing Permissions. 8.1 Introduction. 8.2 Understanding Ownership, User Group and Others. 8.3 Changing File Ownership. 8.4 Understanding Basic Permissions. 8.5 Managing Basic Permissions. 8.6 Understanding Special Permissions. 8.7 Managing Special Permissions. 8.8 Understanding ACLs. 8.9 Managing ACLs. Exercise 8. Explanation to Exercise 8. Summary. Quiz exercise about permissions. Lesson 9: Configuring Networking. 9.1 Introduction. 9.2 Understanding NIC Naming. 9.3 Managing NIC Configuration with the ip Command. 9.4 Storing Network Configuration Persistently. 9.5 Understanding Network Manager. 9.6 Using Network Manager Utilities (nmcli, nm-tool). 9.7 Understanding Routing and DNS. 9.8 Configuring Routing and DNS. 9.9 Understanding Network Analysis Tools. 9.10 Using Network Analysis Tools. Exercise 9. Explanation to Exercise 9. Summary. Glossary exercise about Part 1. Part 2—Operating Red Hat Enterprise Linux Servers. Lesson 10: Managing Processes. 10.1 Introduction. 10.2 Understanding Jobs and Processes. 10.3 Managing Shell Jobs. 10.4 Getting Process Information with ps. 10.5 Understanding Memory Usage. 10.6 Understanding Performance Load. 10.7 Monitoring System Activity with top. 10.8 Sending Signals to Processes. 10.9 Understanding Priorities and Niceness. 10.10 Changing Process Nice Values. Exercise 10. Explanation to Exercise 10. Summary. Fill in the blank exercise about Lesson 10. Lesson 11: Managing Software. 11.1 Introduction. 11.2 Understanding Meta Package Handlers. 11.3 Setting up Yum Repositories. 11.4 Using the yum Command. 11.5 Using rpm Queries. Exercise 11. Explanation to Exercise 11. Summary. Lesson 11. Fill in the Blank Exercise. Lesson 12: Working with Virtual Machines. 12.1 Introduction. 12.2 Introducing KVM Virtualization. 12.3 Managing Libvirt and KVM. 12.4 Using virsh. 12.5 Using virt-manager. Exercise 12. Explanation to Exercise 12. Summary. Lesson 13: Scheduling Tasks. 13.1 Introduction. 13.2 Cron Versus at. 13.3 Understanding Cron Configuration Files and Execution Times. 13.4 Scheduling with Cron. 13.5 Using at. Exercise 13. Explanation to Exercise 13. Summary. Lesson 14: Configuring Logging. 14.1 Introduction. 14.2 Understanding rsyslogd and journal. 14.3 Integrating rsyslogd and journal. 14.4 Configuring Rsyslog Logging. 14.5 Working with Journal. 14.6 Understanding logrotate. 14.7 Configuring logrotate. Exercise 14. Explanation to Exercise 14. Summary. Lesson 12-14 Quiz Exercise. Lesson 15: Managing Partitions. 15.1 Introduction. 15.2 Understanding Disk Layout. 15.3 Creating Partitions. 15.4 Understanding File System Differences. 15.5 Making the File System. 15.6 Mounting the Partition Manually. 15.7 Understanding /etc/fstab. 15.8 Mounting Partitions via /etc/fstab. 15.9 Understanding Encrypted Partitions. 15.10 Creating a LUKS Encrypted Partition. 15.11 Dealing with "Enter root password for maintenance mode". Exercise 15. Explanation to Exercise 15. Summary. Fill in the blank exercise about Lesson 10. Lesson 16: Managing LVM Logical Volumes. 16.1 Introduction. 16.2 Why use LVM. 16.3 Understanding LVM Setup. 16.4 Creating an LVM Logical Volume. 16.5 Understanding Device Mapper and LVM Device Names. 16.6 Understanding LVM Resize Operations. 16.7 Growing an LVM Logical Volume. 16.8 Shrinking an LVM Logical Volume. Exercise 16. Explanation to Exercise 16. Summary. Lesson 15/16 Quiz Exercise. Part 2: Glossary Exercise. Part 3—Performing Advanced System Administration Tasks. Lesson 17: Managing the Kernel. 17.1 Introduction. 17.2 Understanding the Modular Structure of the Kernel. 17.3 Working with Kernel Modules. 17.4 Modifying Kernel Module Behavior Through modprobe. 17.5 Tuning Kernel Behavior Through /proc. 17.6 Using sysctl. 17.7 Updating the Kernel. Exercise 17. Explanation to Exercise 17. Summary. Lesson 18: Using Kickstart. 18.1 Introduction. 18.2 Understanding Kickstart Usage. 18.3 Creating a Kickstart File. 18.4 Using the Kickstart File for Automatic Installations. 18.5 Using Kickstart Files in Fully Automated Datacenters. Exercise 18. Explanation to Exercise 18. Summary. Lesson 19: Managing and Understanding the Boot Procedure. 19.1 Introduction. 19.2 Boot Procedure Generic Overview. 19.3 Understanding Grub2. 19.4 Modifying Grub2 Parameters. 19.5 Understanding systemd. 19.6 Managing Services in a systemd Environment. 19.7 Understanding systemd targets. 19.8 Switching between systemd targets. 19.9 Managing File System Mounts in a systemd Environment. 19.10 Managing Automount in a systemd Environment. Exercise 19. Explanation to Exercise 19. Summary. Lesson 20: Using Kickstart. 20.1 Introduction. 20.2 Changing Grub Parameters on Boot. 20.3 Making Grub Changes Persistent. 20.4 Starting the rescue.target Mode. 20.5 Changing the Root Password. Exercise 20. Explanation to Exercise 20. Summary. Lesson 19/20 Multiple Choice Exercise. Part 3: Glossary Exercise. Part 4—Managing Network Services. Lesson 21: Managing HTTP Services. 21.1 Introduction. 21.2 Understanding Apache Configuration. 21.3 Creating a Basic Web Site. Exercise 21. Explanation to Exercise 21. Summary. Lesson 22: Managing SELinux. 22.1 Introduction. 22.2 Understanding the Need for SELinux. 22.3 Understanding SELinux Modes and Policy. 22.4 Understanding SELinux Labels and Booleans. 22.5 Using File System Labels. 22.6 Understanding semanage. Context and Chcon Differences. 22.7 Using Booleans. 22.8 Configuring SELinux for Apache. Exercise 22. Explanation to Exercise 22. Summary. SELinux Fill in the Blank Exercise. SELinux multiple choice exercise. Lesson 23: Configuring a Firewall. 23.1 Introduction. 23.2 Understanding Firewall Configuration. 23.3 Using Firewall. Exercise 23. Explanation to Exercise 23. Summary. Lesson 24: Configuring a Firewall. 24.1 Introduction. 24.2 Understanding FTP Configuration. 24.3 Configuring an FTP Server for Anonymous Downloads. Exercise 24. Explanation to Exercise 24. Summary. Lesson 25: Configuring Time Services. 25.1 Introduction. 25.2 Understanding Time on Linux. 25.3 Setting up a Chrony Time Server. Exercise 25. Explanation to Exercise 25. Summary. Lesson 26: Configuring VNC Access. 26.1 Introduction. 26.2 Understanding VNC. 26.3 Configuring a VNC Server. 26.4 Connecting to a VNC Server. Exercise 26. Explanation to Exercise 26. Summary. Network services multiple choice exercise. Part 4: Glossary exercise. About LiveLessons Video Training. LiveLessons Video Training series publishes hundreds of hands-on, expert-led video tutorials covering a wide selection of technology topics designed to teach you the skills you need to succeed. Instruction throughout offers detailed explanations, demos, tips, and more. This Complete Video Course includes interactive hands-on exercises for each lesson with thorough video explanations. Major topics include: Part 1: Performing Basic System Management Tasks. 1: Installing Red Hat Enterprise Linux Server. 2: Using Essential Tools. 3: Essential File Management Tools. 4: Working with Text Files. 5: Connecting to a RHEL Server. 6: Managing Users and Groups. 7: Connecting to an LDAP Server. 8: Managing Permissions. 9: Configuring Networking. Part 2: Operating Red Hat Enterprise Linux Servers. 10: Managing Processes. 11: Managing Software. 12: Working with Virtual Machines. 13: Scheduling Tasks. 14: Configuring Logging. 15: Managing Partitions. 16: Managing LVM Logical Volumes. Part 3: Performing Advanced System Administration Tasks. 17: Managing the Kernel. 18: Using Kickstart. 19: Managing and Understanding the Boot Procedure. 20: Applying Essential Troubleshooting Skills. Part 4: Managing Network Services. 21: Managing HTTP Services. 22: Managing SELinux. 23: Configuring a Firewall. 24: Configuring FTP Services. 25: Configuring Time Services. 26: Configuring VNC Access. About the Instructor: Sander van Vugt is an independent Linux trainer, author and consultant living in the Netherlands. The course includes 100% coverage of exam objectives, hands-on exercises included with each lesson so you can practice what you learned in a real CLI environment. Description: Red Hat Certified System Administrator (RHCSA) Complete Video Course contains over 16 hours of training with content divided into 4 parts with 26 video lessons. Overview: Red Hat Certified System Administrator (RHCSA) Complete Video Course is an engaging self-paced video training solution that provides learners with over 16 hours of personal, visual instruction from an expert trainer with over 20 years of practical Linux teaching experience. As a consultant he is specialized in Linux High Availability solutions and Performance Optimization. Sander has written numerous books about different Linux related topics, and many articles for Linux publications around the world. This professional and personal technology video series features world-leading author instructors published by your trusted technology brands: Addison-Wesley, Cisco Press, IBM Press, Pearson IT Certification, Prentice Hall, Sams, and Que. There's also live online events, interactive content, certification prep materials, and more. Sander has been teaching Red Hat, SUSE and LPI Linux classes since 1994. View all LiveLessons on InformIT at The video lessons in this course review each exam objective so you can use this course as a complete study tool for taking the Red Hat Certified System Administrator (RHCSA) Complete Video Course.
